Microsoft Office 2010

Microsoft's Office 2010, which is expected to be released in the first half of 2010, is turning some heads. Microsoft seems to be emulating Google's browser based Apps products as it moves towards incorporating web browser versions of Word, Excel, PowerPoint, and OneNote.

Although these browser based versions do not have all of the capabilities as the desktop versions, they allow for users to edit documents that have been shared with them. For product demos and in depth information as to how Office 2010 can revolutionize your business, [CLICK HERE](#).

Desktop Backup & Recovery.

Never lose your data again.

By Jeff Alerta - Director of Technology

Have you every asked yourself, 'What do I do in case my computer crashes? How do I get all my information back?' It is only a matter of time before you experience a computer crash. One way to prepare for the inevitable crash is to implement a RAID 1 mirroring solution.

'RAID' stands for 'Redundant Array of Inexpensive Disks.' The simple explanation of 'RAID' is that you spread your data over multiple hard drives and hardware and/or software allows you to 'rebuild' your hard drive data in the event of the loss of one or more of your computer hard drives.

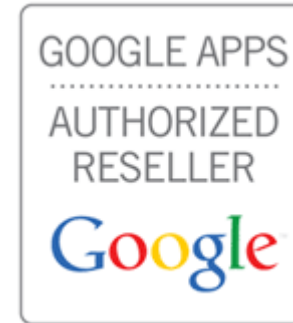

RAID 1, also called 'mirroring,' is when your computer has 2 hard drives that are 'mirror' images of each other. This solution works well for larger computers where you can fit 2 hard drives and the RAID controller hardware needed to manage the RAID drives.

For smaller laptops where adding another hard drive is not possible, it is possible to create 'mirror images' of your laptop hard drive using commercial software products such as Norton Ghost or Acronis True Image or the open source software, CloneZilla.

Plug in Sports Car!

The Fisker-Karma is a plug-in hybrid luxury sports sedan.

The Fisker-Karma, a plug-in hybrid luxury sports sedan, was first revealed in 2008 at the North American International Auto Show. The vehicle is currently being sold; it will be manufactured in the fall of 2009 and delivered in early 2010.

The Karma's plug-in hybrid technology, Q DRIVE, consists of a small gasoline engine that turns the generator, which charges the lithium ion battery pack, powering the electric motor which turns the rear wheels. Consumers can drive the car emission free for 50 miles per day as long as it is charged every night. In such a scenario, the vehicle will only need to be fueled once a year. A full-length solar roof is one option which is offered; not only does it provide additional battery-charging capability, it also keeps the cabin cool on hot days.

The Karma goes from 0-60 in less than 6 seconds and tops out at 125 mph. The Fisker Karma is currently being sold for \$87,000.00.

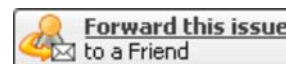

Series Highlights: Built-in stereo speakers, long battery life for up to 42 hours of music or 6.5 hours of video playback, FM tuner, voice and FM recording, built-in stand, 2.4" LCD (measured diagonally)

Available in 8GB \$109.95 and 16GB \$129.95 models from Sony
