What is Watson.

Man vs. Machine

Jeopardy's newest competitor will soon be none other than... Watson! IBM has spent the past two years developing this 'Question Answering' system, which has been a difficult technological boundary to overcome. Watson will be tested for its ability to "understand complex questions and answer with enough precision and speed to compete on Jeopardy!" Soon, Watson will step up to the plate in the ultimate man vs. machine challenge.

7up!

Take a tour of the new Windows 7.

The new Windows operating system, named "Windows 7," is scheduled to be released soon. It is promising to be more stable and compatible than its predecessor, Windows Vista.

Windows 7 will offer an enhanced user interface, better communication and entertainment features as well as better security towards malicious software and spyware.

Most of our clients are still using Windows XP and Inverselogic does not recommend upgrading to Windows 7 just yet. However, from initial tests here at Inverselogic, it seems to be much more stable than Windows Vista and a good choice for upgrading the Windows XP platform on new computers installed at your office or home network.

Hackers Wanted...

Infected or alive!

While we spend hundreds of dollars on anti-virus software and firewalls in an effort to build the thickest walls for defense, hackers always manage to get in. Finally, Symantec, the leader in computer virus security, has decided to take a proactive approach. Instead of formulating new software, they will use their customers to track down

featuring property listings database, flyer uploads and links to social media.

Tips & Tricks

One of the main elements that the search engines use to determine the topic(s) of a website is the HTML text on its pages. So it is important to make sure that your web pages have textual content and not just images.

hackers and report the information to authorities. Customers who choose to participate will simply allow for Symantec to collect data during attempted intrusions. Beginning next year, they will also offer cash bounties for any information which will lead to an arrest. Seeing that the number of internet crime complaints jumped 33% in 2008, Symantec will probably have many frustrated victims volunteering for this program.

Cool New Toys

Portable Map Projector

Maptor is an innovative portable map projector concept by Jin-Sun Park and Seon-Keun Park that promises to eliminate the need for paper maps.

Equipped with GPS and a small projector, Maptor allows the user to display maps on almost any surface and view their current location.
